## ◦ SKILLS ◦

Powerpoint

Excel

Power BI

Python

SQL

R

Predictive Modeling

HTML/CSS/JavaScript

## 👤 PROFILE

As an Artificial Intelligence student at Breda University of Applied Sciences, I translate data into valuable and comprehensible insights. My goal is to improve results, make the right decisions and let the AI be as ethical as possible. I am experienced in machine learning, supervised and unsupervised algorithms, and use data visualization techniques to present the results.

Since I was young, I have always enjoyed solving puzzles and building stuff from the beginning. So that's how I look at big data sets: to me, it is one big puzzle I want to solve. Finding patterns nobody else sees is a challenge to me.

In my free time, I like to play football, games, and also coding. Since I am a second-year, coding is a big part of me. I always want to develop myself by either following an (online) course or just by creating a new application. Meanwhile, I am trying to get the certificate of the Data Scientist Track on DataCamp.

## 📁 WORK EXPERIENCE

### Cashier, Plus, Waspik

May 2021 — May 2022

- Welcomed customers and provided them with information and excellent service.
- Answered all customer questions in a friendly and professional manner.

### Stock Clerk, Kruidvat, Kaatsheuvel

July 2020 — January 2021

- Welcomed customers and was responsible for making sure that consumers have access to the merchandise they are looking for by organizing product displays and storage.

### Stock Clerk, Jumbo, Kaatsheuvel

June 2019 — August 2020

## 🎓 STUDY

### Artificial Intelligence, Breda University of Applied Sciences, Breda

September 2022 — June 2025

In this study, I will be trained in Data Science, AI, consultancy skills and technological (programming) skills. My professional career requires me to have both a broad knowledge of data management & Artificial Intelligence and deep skills in my chosen area of expertise, Data Science, Consultancy and Programming. propeduse Bachelor of Science is obtained

The propeduse Bachelor of Science is obtained.

## ⚙️ CERTIFICATES

Data Manipulation with pandas (Completed in July 2022), DataCamp

Intermediate Python (Completed in April 2022), DataCamp

Introduction to Python (Completed in June 2022), DataCamp

Design Thinking: Understanding the Process (Completed in April 2022), LinkedIn

Interaction Design: Flow (Completed in April 2022), LinkedIn

**Interaction Design: Interface (Completed in April 2022), LinkedIn**

**Project Management Foundations: Risk (Completed in April 2022), LinkedIn**

**Scrum: The Basics (Completed in May 2022)), LinkedIn**

**UX Foundations: Interaction Design (Completed in April 2022), LinkedIn**

**UX Foundations: Usability Testing (Completed in April 2022), LinkedIn**

**Agile at Work: Driving Productive Agile Meetings (Completed in June 2022), LinkedIn**

**Agile at Work: Getting Better with Agile Retrospectives (Completed in June 2022), LinkedIn**

**Analyze Data with Python Skill Path (Completed in September 2021), Codecademy**

**Learn Data Analysis with Pandas Course (Completed in September 2021), Codecademy**

**Learn Python 3 Course (Completed in September 2021), Codecademy**

**Linear Algebra Course (Completed in January 2022), Codecademy**
